

The Selecting Guidebook

FreeRider[®]

2018

Why choose us?

Here is the selecting guidebook for you to choose the FreeRider scooter. We disclose the details which you may not been known from others.

We guide you the most suitable products from our detail info.

Luggie

Luggie Series is the folding scooters that have been selling over 10 years. We're the pioneer and leader in folding scooter industries.

Nowadays, among the folding scooter competition, Will let you know the details you should choose us for your daily mobility purpose.

Power Chair

TravelRider is the redefinition of the portable power chair.

We adopt Luggie mechanical advantages to innovate the power chair for customers who has limit wrist capability in daily mobility. Also, we improve the **Traction Ability** from all the traditional power chair. Joystick will be followed and leaded to your direction with your feather touch.

FR Scooter

FR Scooter is categorized for strong demands in comfortable experiences. Every FR scooters are capable to ride min 20 miles in your journey.

FR Scooters are well-equipped with **Delta handle**, large seat. From solid tires to air, from bulb to LED, from fixed seat to angle adjusted ones, we offer more useful values on your scooters, but you spend less.

Zero-Worried to your Luggie Scooter

ZERO

Zero-Welding: Whole frame is adopted T6061 aluminum alloy which is common to be used aircraft material. Forging process to enhance the capability.

Zero-barrier: Without barrier in the front chassis design for outdoor terrain purpose.

Zero-Lifter: Multi-folding designing for you lift the trunk without lifter to save your cost & your space

Zero-upgrade: Luggie can be used all Luggie lithium-ion battery series.

*Classic model need to be adaptor.

Folding Variations

F

Fully folding

Fully folding is the basic folding scooter requirement for you to carry like a luggage..

H

Half folding

Half folding is the ONLY features among the folding scooters. It helps you carry the scooters against the trunk bumper without 100% effort and lifter to save your space and cost.

Q

Quick Folding

Quick folding is the ways, down your tiller and fold your seat and close the seat back and you're ready to go.

UN 38.3

An International testing criteria for lithium battery or equipment containing lithium battery should undergo all testing criteria.

All of our lithium-ion battery are certified the UN 38.3 criteria. Battery weight is 4.5lbs.

Customers can be carry the light weight battery to airline. It is **TSA approved.**

Values

EFFICACY

Adopted aircraft aluminium class as chassis and with zero-welding technique to make the strongest chassis than other power chair suppliers. It is **smallest footprint and biggest weight capacity** folding power chairs in the world.
