

# SunShade Canopy Instructions

Hardware is included.

These written instructions coincide with our instructional video on YouTube at <https://www.youtube.com/watch?v=4E0CtEz-uaI>.

- 1) Wrap red cover tightly around the frame.
- 2) Secure with the 4 Velcro strips that are across from one another.
- 3) Attach the T-shaped bracket to the frame and secure with the 2 (smaller) black knobs.
- 4) Secure the remaining Velcro strips around the bracket.
- 5) Attach the L-shaped bracket to your scooter's universal accessory hitch and secure with the Clevis pin followed by the one of the remaining black knobs. Note: You can adjust the distance of the unit from your scooter by using any of the Clevis pin holes on the bracket.
- 6) Place the covered frame into the L-shaped bracket and secure with the Clevis pin followed by the last black knob. Note: You can adjust the height of the canopy using the Clevis pin holes on the bracket.

**Now you're ready to enjoy the shade!**
